### **DETAILED ACTION**

1. Appellants' arguments (Appeal Brief Filed August 19, 2004, Page 4, Lines 11-22; Page 5, Lines 3-7 and Page 5, Lines 14-19) are persuasive. Rejection of Claims 1-18 has been withdrawn accordingly.

#### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

The instant invention recites methodology and apparatus for recursively linking a multiply modified multimedia asset to an original (digital negative) image in a distributed network. The digital negative of the multimedia asset is modified to form a first resultant multimedia asset based upon which a first edit list (Specification, Page 10) will be generated. The modification includes at least a digital image that is at a lower resolution than the digital negative. The first edit list, in turn, is associated with the first resultant multimedia asset and linked to the digital negative of the multimedia asset. The first resultant multimedia asset is then modified to form a second resultant multimedia asset based upon which a second edit list will be generated. On a recursive basis, the second edit list will be associated with the second resultant multimedia asset and further linked to the first resultant multimedia asset.

The features identified, in combination, are neither discussed nor suggested by the prior arts of record.

3. Claims 1-18 are allowed.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2623

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
